

Score Your Practice Across 5 Dimensions — Get a Prioritized Action Plan in 24 Hours

Why Professional Services Firms Are Different

You don't sell products. You sell **expertise, trust, and time**.

But your operations probably look like this: - Client onboarding: 3 weeks, 12 emails, 4 PDF forms, 1 confused client - Meeting notes: Scattered across Teams, OneNote, paper, memory → never in CRM - Monthly reporting: Copy-paste from 5 systems into PowerPoint at midnight - Knowledge base: "Ask Sarah, she knows" (Sarah left 6 months ago) - Intake: Manual conflict checks, engagement letters, KYC — all human, all slow

Every hour spent on admin is an hour not billing at R2,500+/hr.

The 5-Dimension AI Readiness Scorecard

We score your practice 0-100 across each dimension. The composite tells you exactly where automation pays off fastest.

1. Client Onboarding & Intake (Weight: 25%)

The Question: *How many touchpoints from "Yes, I want to engage" to "Billable work starts"?*

Indicator	Score 0-20	Score 21-50	Score 51-80	Score 81-100
Digital intake forms	Paper/PDF only	Fillable PDF	Web form + e-sign	Smart form → auto-populates CRM, engagement letter, KYC
Conflict checks	Manual search	Spreadsheet check	Automated vs. client DB	Real-time API check + alert
Engagement letters	Manual draft	Template + mail merge	Auto-generated from intake	Dynamic + e-sign + auto-file
Client portal setup	None	Email instructions	Manual invite	Auto-provisioned on sign
Avg. days to billable	21+	14-20	7-13	< 5

Quick Win: Tally.so form → Make → DocuSign template → Airtable → Slack alert. **Setup: 2 hours.**

2. Knowledge Management & Institutional Memory (Weight: 20%)

The Question: *If your senior partner gets hit by a bus, how much walks out the door?*

Indicator	Score 0-20	Score 21-50	Score 51-80	Score 81-100
Centralized KB	None / shared drives	Notion/Confluence (messy)	Structured, tagged, searchable	AI-queryable (RAG) + versioned
Precedent/template library	Desktop folders	Shared drive	Organized + metadata	Auto-suggested by matter type
Meeting capture	Handwritten notes	OneNote/Teams (unsearchable)	Auto-transcribed + tagged	Summarized → action items → CRM
Expertise location	"Ask Sarah"	Skills spreadsheet	Searchable profiles	AI: "Who knows POPIA + trusts?"
Onboarding new hires	3 months shadowing	6 weeks guided	2 weeks self-serve	1 week with AI assistant

Quick Win: Fathom/Grain for meeting recording → Make → Notion DB with tags. **Setup: 1 hour.**

3. Reporting & Client Communication (Weight: 20%)

The Question: *How much billable time becomes "reporting overhead"?*

Indicator	Score 0-20	Score 21-50	Score 51-80	Score 81-100
Monthly/quarterly reports	Manual in PPT/Word	Semi-auto (Excel links)	Data pulls auto, narrative manual	Fully auto + AI narrative draft
Client dashboards	None	PDF export	Live (PowerBI/Notion)	White-labeled, self-serve
Ad-hoc request turnaround	Days	Same day	Hours	Minutes (self-serve)
Regulatory/compliance reports	Manual compilation	Checklist + manual	Semi-auto data pulls	Auto-generated + review workflow
Billable vs. non-billable ratio	Unknown	Tracked monthly	Tracked weekly	Real-time dashboard

Quick Win: Airtable (source data) → Make → Google Slides template → PDF → Email. **Setup: 3 hours.**

4. Meeting-to-CRM & Action Tracking (Weight: 20%)

The Question: *How many action items fall through the cracks?*

Indicator	Score 0-20	Score 21-50	Score 51-80	Score 81-100
CRM adoption	"What's CRM?"	Contacts only	Deals + activities	Full lifecycle + automation
Meeting → CRM entry	Never	Manual (forgotten)	Assistant does it	Auto: transcript → summary → tasks → CRM
Task follow-up	Memory/email	Planner/To Do	Assigned + tracked	Auto-reminders + escalation
Client communication log	Inbox search	BCC to CRM	Auto-logged (email/cal)	Unified timeline + AI summary
Pipeline visibility	Gut feel	Spreadsheet	CRM dashboard	Forecast + risk scoring

Quick Win: Fathom → Make → HubSpot/Clio/Pipedrive (create note, tasks, update deal). **Setup: 2 hours.**

5. AI & Automation Maturity (Weight: 15%)

The Question: *Are you experimenting or operationalizing?*

Indicator	Score 0-20	Score 21-50	Score 51-80	Score 81-100
AI tools in daily use	None	ChatGPT ad-hoc	Team prompts shared	Custom GPTs / agents deployed
Automation platform	None	Zapier (basic)	Make/n8n (multi-step)	Self-hosted + custom functions
Workflow documentation	None	Some SOPs	All core flows mapped	Living docs + version control
ROI measurement	Gut feel	Time saved estimates	Tracked per automation	Revenue-attributed dashboard
Governance/policy	None	Informal	Written policy	POPIA-aligned + audit trail

Quick Win: Build 1 custom GPT for your top repetitive task (e.g., "Draft engagement letter from intake data"). **Setup: 30 min.**

Your Scorecard Output: What You'll Receive

Fill the form → We score you across all 5 dimensions → Within 24 hours:

Deliverable	Format	Value
5-Dimension Scorecard	PDF + Notion	Visual radar chart, dimension scores, benchmark vs. peers
Priority Matrix	1-pager	Effort vs. Impact plot — your "Do First / Schedule / Delegate / Kill"
3 Quick Wins	Loom video + Make blueprints	Exact builds for your highest-ROI automations
90-Day Automation Roadmap	Spreadsheet	Phased plan: Week 1-2, Month 1, Month 2, Month 3
Tool Gap & Budget	Spreadsheet	What to buy, build, kill — with monthly cost
30-min Strategy Call	Calendly	Walk the roadmap, answer questions, decide on build vs. buy

Real Example: "Naidoo & Associates" (Commercial Law, Durban)

Scores Before: - Onboarding: 35/100 - Knowledge: 28/100 - Reporting: 42/100 - Meeting→CRM: 31/100 - AI Maturity: 15/100 - **Composite: 31/100**

Top 3 Quick Wins Implemented: 1. **Smart Intake Form** (Tally → DocuSign → Clio → Slack) — onboarding 21 days → 4 days 2. **Meeting Intelligence** (Fathom → Make → Clio notes + tasks) — 100% meeting capture, zero manual entry 3. **Monthly Report Automation** (Clio + Xero → Airtable → Google Slides → PDF) — 4 hrs/mo → 15 min

Results at 90 Days: - Onboarding score: 35 → 82 - Composite: 31 → 67 - **Billable hours recovered: 47 hrs/month/partner** - **Revenue impact: +R1.2M annualized across 3 partners**

The Stack We Recommend for Professional Services

Layer	Tool	Why for Professional Services
Practice Mgmt	Clio / Xero Practice / CaseWare	Industry-specific, POPIA-aware
Automation	Make	Visual, handles complex logic, on-prem option
Knowledge Base	Notion (or Obsidian for local-first)	Flexible, AI-ready, great permissions
Meetings	Fathom / Grain	Auto-record, transcribe, summarize, integrate
E-Sign	DocuSign / SigniFlow (SA)	SA-compliant, API-first
CRM	HubSpot / Pipedrive / Clio Grow	Depends on firm type
AI	Custom GPTs / Local LLM (Ollama)	Data sovereignty for client confidentiality

Layer	Tool	Why for Professional Services
Reporting	Google Slides / Notion / PowerBI	Client-facing + internal

Monthly at scale: ~R3,000-8,000/firm (scales with partners, not users)

POPIA & Confidentiality: Non-Negotiable

Every automation we design for professional services includes: - **Data processing agreements** with every subprocessors - **Local hosting options** (Make self-hosted, Ollama local LLM, SA data centers) - **Audit trails** on every client data touchpoint - **Retention policies** baked into workflows - **Client consent logging** (your new intake form captures this)

We don't ship anything that wouldn't pass a regulator's audit.

Ready for Your Scorecard?

Book a free 30-minute AI Strategy Call and we'll: 1. Run the 5-dimension assessment live (15 min) 2. Show the exact Make blueprints for your top 3 gaps (10 min) 3. Give you the deployment files — or build turnkey with POPIA compliance baked in (5 min)

No pitch. No pressure. Just your prioritized automation roadmap.
